INSTRUCTIONS

GENERAL: Send an original copy of the application and exhibits, at least 2,500 viable seeds, and $500 fee ($250 filing fee and $250 examination fee) to U.S. Dept. of Agriculture, Agricultural Marketing Service, Livestock, Poultry, Grain and Seed Division, Plant Variety Protection Office, National Agricultural Library Building, Beltsville, Maryland 20705. (See section 180.175 of the Regulations and Rules of Practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

5 Give the date the applicant determined that he had a new variety based on (1) the definition in section 41(a) of the Act and (2) the date a decision was made to increase the seed.

13a Give: (1) the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method; (2) the details of subsequent stages of selection and multiplication; (3) the type and frequency of variants during reproduction and multiplication and state how these variants may be identified and (4) evidence of uniformity and stability.

13b Give a summary statement of the variety's novelty. Clearly state how this novel variety may be distinguished from all other varieties in the same crop. If the new variety most closely resembles one or a group of related varieties: (1) identify these varieties and state all differences objectively; (2) attach statistical data for characters expressed numerically and demonstrate that these differences are significant; and (3) submit, if helpful, seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty.

13c Fill in the Exhibit C, Objective Description form, for all characteristics for which you have adequate data.

13d Describe any additional characteristics that are not described, or whose description cannot be accurately conveyed in Exhibit C. Use comparative varieties as is necessary to reveal more accurately the description of characteristics that are difficult to describe, such as, plant habit, plant color, disease resistance, etc.

14a If "YES" is specified (seed of this variety be sold by variety name only as a class of certified seed) the applicant may NOT reverse his affirmative decision after the variety has either been sold and so labeled, his decision published, or the certificate has been issued. However, if the applicant specified "NO," he may change his choice. (See section 180.16 of the Regulations and Rules of Practice.)

15a See section 42 of the Plant Variety Protection Act and section 180.7 of the Regulations and Rules of Practice.

13A. Exhibit A

Pedigree: Slimgreen x own parentlines.

Gourmet
~~RS 2214~~ has been derived from several backcrosses of our parentlines to incorporate the pod qualities of Slimgreen in the variety and to improve the plant type.

The backcross method of breeding has been used. For the last several generations line selection has been carried out. Disease resistance testing has been carried out before multiplication of elite seeds.

Gourmet
~~RS 2214~~ appears stable and uniform through several generations of selfing and during our seed increase program.
Flat podded off-types appear approximately 1 : 10,000.

13B. Exhibit B Novelty Statement

Gourmet
~~RS 2214~~ is most similar to Smilo.
Gourmet
~~RS 2214~~ differs from Smilo in its darker pods
(Smilo : 143 C*, Gourmet ~~RS 2214~~ : 138 B*) and in its longer pods
(Smilo : 10 cm, Gourmet ~~RS 2214~~ : 11 cm)

Gourmet
~~RS 2214~~ is also similar to Pros, but is one day earlier maturing and has smaller fly-leaves (bractea).

Subject: bean application No. 8000110, ~~RS 2214~~ Gourmet. 187 810312

Dear Mr. Frey,

In addition to your request dated May 23, 1980 for statistical data on the podlength of ~~RS 2214~~ Gourmet and Smilo, we can inform you that in a sample of 100 mature pods of each variety we had the following results:

	average podlength	standard error	n
~~RS 2214~~ Gourmet	10,9 cm	0,3	100
Smilo	10,1 cm	0,3	100

We hope that this information is sufficient to process the application.

Yours sincerely,
